If you need more space, I will give it to you.

HCG's new low-tank watercloset, **Hilton C3032**, is designed to save space and water. Organize and style without restraint. Its tank, though 20% shorter than the rest at 615mm, is carved out to give you creative flexibility. While it's low, it saves big on water. Using only 4.8 liters every flush or 20% less water, it makes a wise earth-friendly choice.

Save space. Save our precious planet.

United Architects of the Philippines

Warm greetings to all of the Officers and Members of the UAP!

In this day of age, where borders brought about by Globalization are rapidly becoming unseen, liberalization becoming the norm; the demands and expectations in every aspect is being felt the strongest. The objectives of the integration of the 10 Southeast Asian Nations: economic growth, improvement of cultural relations, creation of more opportunities has been the heart of every conversation and it is only

fitting that our theme for the 41st Annual National Convention, "Empowering Architects Towards ASEAN Integration" be aligned with these objectives.

A good leader encourages competition; a better leader encourages healthy competition. The difference between that two is that the latter's main goal is to inspire the other for the benefit of the common good. The motive should always be for the greater good of the majority, for the continuous improvement of not only oneself but towards the development of one another. The activities set forth by the Organizing Committee encourage healthy competition by equipping the architects with the right tools to prepare for the integration and the inevitable challenges that lay ahead. There's the "UAP Convention Exhibit, Arkilympics, General Assembly and Business meetings, Investiture of New Fellows, CPE Seminars, Architectural Tours and Fellowship Night". The ultimate intention is to create awareness of the different aspects required by the integration, the technologies to be used, the building of a stronger and affordable infrastructure, disaster resilient housing, whilst keeping sustainability in mind in every creative design, in every idea realized by every Architect.

The Organization has experienced its share of adversities throughout the years, yet in every year we have managed to stay strong as one team. This strength comes from every member's unconditional service and continuing importance given to staying united regardless of the position in the organization. In UAP, all roles are valued, as each person is a representative of what the organization is all about. Let our vision be our guide in overcoming individual differences.

I would like to thank the Organizing Committee, the UAP Secretariat, my Fellow Officers and Members for their contributions, ensuring the success of this national conference. I take pride in leading such individuals and feel honored and humbled by the service you all have given.

Congratulations!

MA. BENITA O. REGALA, fuap, asean ar.

United Architects of the Philippines

It is with great honor and privilege that I extend my sincerest gratitude to the delegates and allies of the United Architects of the Philippines as we celebrate the 41st National Convention of Architects at the SMX Convention Center from April 16-18, 2015.

ASEAN integration is a buzzword and topic for many discussions in nearly every professional conferences and gatherings. The advent of ASEAN Economic Community this year is not going to result in immediate changes in the ASEAN labor market. As economic integration progresses overtime, the region may observe structural changes that enhance employment prospects. But those changes will take time. However, policy makers will need to start preparing for such changes now.

Therefore, the United Architects of the Philippines endeavors to be at the forefront for Empowering Architects Towards ASEAN Integration. Let this Convention provides enhancement programs to meet the demands of the ASEAN Integration. May this convention, therefore, impart the desired skills and competency as we look forward to more shining moments for Filipino architects as we are about to enter into ASEAN Integration. With the concerted efforts of the organizing committee, we can confidently meet the future with dedicated, competent, ethical and socially responsible professional architects that imbibe the qualities of leadership, authority, accountability, stewardship and transparency

Welcome to the 41st UAP National Convention. *Mabuhay tayong lahat!*

ROGER T. ONG, uap

Executive Director, Commission on Convention, Assemblies and Exhibition

My warmest greeting to all Exhibitors, Sponsors, Architects Delegates and friends in the Industry! Welcome to CONEX 2015 "The Philippines Premiers Building and Construction Expo".

How do you quickly promote your product and touch a wide base of users? Initially, you should win customer confidence based on the buyers and end users. It is very hard to compete with flashy billboards and TV Advertisements, but there's always a better way! A marketing strategy of sniper approach, rather than shotgun! Get your target market into one place! This equates to a huge venue wherein we could house all the existing and upcoming technologies that would be helpful in our daily design and Construction needs!

In line with this beneficial concern, the United Architects of the Philippines (UAP), the integrated and accredited professional organization of (IAPOA) launched its campaign for its forthcoming Convention Exhibits - CONEX 2015 trade exhibition. The three-day event aims to create public awareness of current trends in the construction and real estate industry and this provides a strategic and convenient venue for showcasing the latest product lines of different companies.

The CONEX shall coincide with the 41stNational Convention of Architects with an expected delegation of more than two thousand three hundred (2,300) from all over the country, CONEX 2015 aims to develop an appropriate market setting to enhance sales productivity, open opportunities for public interaction, forge and renew client contacts, generate market presence, launch new products, disseminate information, ascertain client needs, influence client decision-making onwards closing business deals.

Now on its 11th year, CONEX 2015 being a buzzword in the construction and building industry, this has empowered the loyal exhibitors a boost in sales, network and growth. It has gained reputation as one of the top annual construction and building exposition that people look forward to based on the diversity of products that are frequently endorsed by the architect/specifiers of the industry who at the end would give you a failsafe end product.

This year's highlight is the forging of alliance partnership program with four other Construction and Building exhibition organizers in ASIA. CONEX Philippines recently joined Malaysia's ARCHIDEX, Singapore's ARCHXPO, Thailand's ARCHITECTS EXPO and Taiwan's TAIPEI BUILDING SHOW therefore forming the Asia's BIG 5 in the field of this particular annual event.

In behalf of team CONEX 2015, I would like to thank all the Exhibitors, Sponsors, Architects, Guests, and friends in the Industry for supporting and visiting CONEX 2015. Also I would like to congratulate the CONEX 2015 Organizing Committee namely Ar. Roger T. Ong, uap, Executive Director Conventions, Assemblies and Exhibits; ADVISERS: Ar. Alejandro O. Cua, fuap; Ar. With the UAP National Headquarters Building seemingly a work in progress, "sister-spin off" to the Task Force HQ could very well be the Convention Exhibits or CONEX. Although the generic convention exhibits have been with us since the very first UAP Annual NatCon, it was only in 2005 that the CONEX came into being. When the UAP Commission on Conventions and Conferences under Executive Director Architect Alejandro O. Cua saw the opportunity of rapid increase of real estate investments and the development of new technologies for construction materials that he conceptualized a bigger event within a more spacious venue for the diverse construction industry partners to be encourage to expand, promote and showcase their products and services.

This idea came into fruition when the Annual NatCon generic exhibits were decidedly transferred to the World Trade Center in Pasay City. CONEX's birth straddles the terms of two National Presidents in the persons of Architects Robert S. Sac and Enrique O. Olonan. Once again, the UAP-Manila Metro Chapter has been in the core of the CONEX. From the very first group headed By Architect Alejandro O. Cua and Daniel C. Go, this undertaking has been the financial workhorse of the UAP in bridging the gap for settling outstanding dues of the UAP HQ project and as well as some of the day-to-day expenses of the UAP in general. Similar to the UAP 14K, a commemorative marker also graces the footsteps of the UAP HQ entrance porch to honor the efforts of the CONEX 2005 Group. Time and time again, for the past six years of the CONEX's history, Metro members have always held its key chairmanship position. They are Ar. Daniel C. Go (2005), Ar. Geoffrey S. Yu (2006), Ar. Eduardo Casares (2007-2008), Ar. Joenel C. Kho (2009) and Ar. Henry Ng-Tan (2010). (From the Silver Anniversary Souvenir Program of UAP Manila Metro Chapter)

RULES AND REGULATIONS

A. GENERAL RULES AND REGULATIONS: SMX CONVENTION CENTER

- IDs must always be worn by exhibitors and contractors throughout ingress to egress while in the premises of the exhibition hall. "No ID, No Entry" policy will be strictly implemented.
- 2. Food and drinks are not allowed to be brought inside the SMX Convention Center premises.
- Smoking is not allowed within the premises of the SMX Convention Center.
- 4. Proper dress code must be observed at all times and must wear PPE. Wearing of slippers, sleeveless undershirt or "sando" and/or other inappropriate attire is not allowed. Business attire is required.
- Strictly no firearms or deadly weapons are allowed inside the exhibition hall.
- 6. Unruly behavior inside the premises is strictly prohibited.
- 7. Cooking is not allowed within the exhibition hall unless this is with prior approval from the Event Organizer.
- 8. Only SMX accredited caterers may provide food and drinks inside the exhibition hall. Please contact the Event Organizer for more details.
- Exhibitors shall not use nor permit the use of any portion of the SMX Convention Center premises as sleeping or living quarters or uses the same for illegal purposes.
- 10. The Event Organizer and/or the Venue Management reserve the right to regulate the volume of music and/or sound system within the hall which interferes with the activities of neighboring exhibitors.

- 11. Entries, passages, hallways and corridors of the building shall not be used by exhibitors or their personnel for any other purpose than for ingress and egress.
- 12. Freight and Service Elevators are designated for transportation of materials and equipment. Escalators and passenger elevators are for passengers only and may not be used to transport freight or equipment.
- 13. Exhibitors shall not place or allow anybody to place any merchandise or install, attach or incorporate any structure annex or work of any kind, protruding from the premises. Violation of this provision shall give the Event Organizer the right to remove merchandise, structure, etc. without need of notice and all expenses incurred shall be for the account of the exhibitor.
- 14. Exhibitors shall not paint, drive nails, screws or abutments on the walls or frames nor post any indecent, immoral or objectionable inscription nor make alterations, improvements or changes in any part of the exhibition hall, including electrical installation, plumbing and other fixtures without prior written approval from the Event Organizer.
- 15. Exhibitors shall not use or store within the exhibition hall inflammable or explosive materials or gas-fueled appliances in any form or quantity, nor do any act which may expose the venue to fire or increase the volume of fire hazard, or change the insurance rate of the building, it being understood that should the exhibitor do so, he shall be responsible for all the damages which such violation may cause the Event

Organizer, Venue and/or its other exhibitors aside from the exhibitor's other liabilities under its booth rental contract.

- Gambling in any form and/or games where sums of money are at stake shall not be conducted within the exhibition hall.
- 17. Storage of machineries, equipment and other properties of exhibitors in the common areas is strictly prohibited.
- 18. Appropriate protection must be placed on the floor before fountains, ponds, waterfalls or other water features are installed. Installations must be monitored by the Event Organizer and the Official Booth Contractor.
- 19. Decorations and signages may not be taped, nailed or otherwise fastened to any permanent surface. Adhesive-backed decals or stickers may not be placed on any surface of the building. The use of floor decals is subject to approval based on other events in the building and the protection of the floor surfaces. Glitter or confetti may not be used in carpeted areas of the building.
- 20. Helium-filled balloons may not be used or distributed in the leased premises.
- 21. Animals are not permitted in the premises except in conjunction with an approved exhibit, as service animals for persons with disabilities or to assist law enforcement personnel. Animals that are approved must be on a leash, within a pen, cage or other similar control. The owner is fully responsible for obtaining all appropriate permits and for all sanitary needs of the animals.

NOTE: The Event Organizer reserves the right to refuse admission of or dismiss anyone from the hall without any reason. This ruling applies during ingress, the exhibition proper and egress.

B. GENERAL RULES AND REGULATIONS: ADMISSION

1. EXHIBITORS' ID

Exhibitor's ID will be issued to exhibitors, free-of-charge (only up to the entitled number of ID's, please see form 5 at page 31) for admission purposes into the exhibition hall throughout the ingress, show proper and egress days. Additional ID's may be

secured at a minimal cost. Please submit your required number of IDs and return this to the Event Organizer before the stipulated deadline. Please use Form No.5 and must be submitted at the stipulated deadline.

Exhibitors' IDs are to be collected at the Event Organizer's temporary office on-site during ingress. Please note that exhibitors must wear their IDs at all times during the ingress, show proper and egress days while they are in the exhibition hall. Request for replacement of lost exhibitor IDs may be arranged at Two Hundred Pesos only (P 200.00) per piece.

2. CONTRACTORS' PASSES

For the purposes of construction and the moving in of exhibits, contractor passes will be issued by the Event Organizer permitting the exhibitor's ingress crew, and approved outside contractors and their workmen to enter the exhibition hall. These passes will be used only during the ingress and egress dates. These identification passes must be worn at all times while inside the exhibition hall. Lost passes will automatically forfeit the deposit given. If a contractor has a valid reason to be present during the exhibition show dates (e.g. maintenance or remedial purposes), only a minimum number of special passes will be issued upon request. However, the Event Organizer reserves the right to prohibit any contractor from using any pass into the exhibition hall.

3. VISITOR'S COMPLIMENTARY PASSES AND REGISTRATION

All trade visitors will be required to complete a registration form prior to admittance in the exhibition. This will enable the Event Organizer to record a full and comprehensive attendance of visitors. Complimentary passes/invitation mailers will be issued to exhibitors up to its entitlement which may be given out to their clients and invited guests.

4. DELIVERY VEHICLE PASSES

Only delivery vehicles with vehicle passes

prominently displayed on their windshields will be allowed to unload exhibition materials at the loading bay. These delivery vehicle passes may be reproduced/photocopied by the exhibitor based on their actual requirement. The basement parking may be used for delivery trucks that need to park after unloading exhibit goods and materials with a corresponding parking fee. Car park vertical clearance is 2.4 meters.

5. GATE PASS

Exhibit items/materials must be listed on the **GATE PASS FORM** for inspection prior to entry. If the space provided in the gate pass form is not enough, a separate list/delivery receipt where the exhibit items/materials are listed may be attached. **Forms must be completed in QUADRUPLICATE** (please **photocopy as needed**). The delivery entrance guard and the exhibitor must have one copy each. Only Event Organizer-signed gate passes for both ingress and egress will be honored.

Important: Please ensure that the exhibitor's copy is secured as this is the same copy to be used and surrendered during egress.

C. GENERAL RULES AND REGULATIONS: PARKING PASSES DURING SHOW DATES

The basement parking is open to the general public with a fixed fee per entry. As such, the Event Organizer and/or SMX Convention Center Management cannot be held liable for damages or losses incurred even when drivers or car owners have specifically informed the roving guard on duty of its presence. The guard's responsibility lies primarily in the enforcement of the regulations of SMX Administration regarding traffic, parking and molestations from unauthorized people.

Prepaid special car passes valid for the SMX basement parking will entitle **EXHIBITOR VEHICLES** to have unlimited entries and exits daily (valid only during show dates) at only **P 200.00** per pass for three (3) days. This may be claimed at Event Organizer's office during ingress. This special car pass does not guarantee availability of parking

space at the basement and will still be subject to a first come, first served basis. Please present this car pass to the Cashier prior to entry. The Cashier will issue a complimentary ticket and stamp on the car pass. Please surrender the complimentary ticket to the Exit Guard. Lost PARKING PASS will be charged a penalty of **P150.00** plus the regular parking fee of **P 200.00 per pass.**

D. GENERAL RULES AND REGULATIONS: SECURITY DURING SHOW DATES

- General security will be provided by the Event Organizer. Exhibitors and their staff will not be allowed in the exhibition hall beyond the official exhibition hours.
- All personnel in the exhibition halls must wear identification Exhibitor ID.
- For security and safety reasons, exhibit movement, whether in or out of the hall, during show hours is not permitted.
- Strictly NO PERSON INSIDE THE EXHIBIT DURING OFF-SHOW TIME.
- 5. Exhibitors are not allowed to proceed with egress earlier than the specific time stipulated for egress.
- Exhibitors are advised not to leave booths unattended during ingress, show proper and egress, as these are the most vulnerable period for theft. Exhibitors are also advised to take particular care of personal belongings.
- 7. During exhibition dates, it is highly advisable for the exhibitor to assign a representative to be at their booth one (1) hour before the official exhibition hours (7:00 a.m. on the first day for last minute booth touch-ups and at 8:30 a.m. on succeeding show days) to ensure that their exhibit displays are safeguarded considering that other exhibitors who intend to prepare their booth will be allowed entry into the exhibition hall at that time.
- Upon leaving the exhibition hall after the exhibitor has finished setting up its booth or at the end of each exhibition day, it is advisable to properly secure

its booth by installing covering by its entrance or using other means which the exhibitor deems fit depending on their display.

E. GENERAL RULES AND REGULATIONS: FIRE PRECAUTIONS & DANGEROUS MATERIALS

Exhibitors who, because of the nature of their exhibits, require a special type of fire extinguisher must make arrangements at their own cost for the provision of such equipment. Any person, on seeing an outbreak of fire, however slight, must make immediate use of the fire alarm system and subsequently make every endeavor necessary to extinguish the outbreak or to confine it by the use of an extinguisher and/or removal of the goods in the vicinity. No temporary gas or electrical fittings may be used in the exhibition hall. No explosives, petroleum, dangerous gases or highly flammable substances are allowed in the hall.

F. GENERAL RULES AND REGULATIONS: STORAGE AND BOOTH CLEANING

There are no storage facilities inside the exhibition hall for packing cases and other equipment/properties of the exhibitor. Fire regulations prohibit such storage on stands. Arrangements for safe keeping of such items must be with the Exhibitor's responsibility. All fire exits should also be free from any obstruction. The exhibitor shall bear full responsibility in the event of any mishap whatsoever.

During exhibition days, the Event Organizer will be responsible for the cleaning of hallways daily. For exhibitors with subcontractors, it is the responsibility of the latter during ingress and egress to clean the exhibitor's respective area as well as build, dismantle and remove materials from the exhibitor's booth.

G. UTILITIES AND OTHERS

1. FLOOR LOADING CAPACITY

The maximum floor loading capacity is 250 lbs/ft². Special arrangements, including the provision of a base (steel) plate, may be required for any exhibit exceeding this limit. The Event Organizer must be informed of any such exhibit. The delivery schedule for heavy and large exhibits must be strictly adhered to.

2. DAMAGE TO STAND STRUCTURES

No person under any circumstances shall cut into or through any floor covering or wall, or alter any booth service structure. Any such damage to the booth service structure is fully under the liability of the exhibitor. All penalties will be payable to UAP CONEX 2015.

3. ELECTRICAL INSTALLATIONS

a. Power Supply: 500 watts per booth

inclusive of power supply needed for 2 fluorescent lamp sets, 220V per

booth

Total Power Provision: 2,800A for 220V,

225A for 460V

Lighting Level: 112,500 lumens

- b. All electrical mainline connections to booths must be carried out or inspected only by the Official Booth Contractor. Connections and distribution within the booth/stand may be made by the exhibitor or its subcontractor. The additional number and type of electrical fittings and installations required must be indicated by the exhibitor.
- c. No flashing light or signs will be permitted unless forming an integral part of an exhibitor's product. Sequence-lit displays will be subjected to the approval of the Event Organizer. Decision will be based on the rate of light change. No electrical installation and fitting may be suspended from the ceiling of the exhibition hall or be fixed to any part of the building structure. No fitting may project beyond boundaries of the site allocated.
- d. The Event Organizer reserves the right to disconnect the electrical supply to any installations, which in the opinion of the electrical consultant is dangerous, and is likely to cause annoyance to visitors or other exhibitors and/or is not applicable to Philippine Safety Standards.

4. FURNITURE AND AUDIO-VISUAL

EQUIPMENT

Each exhibitor occupying a shell scheme booth is provided with 1 information table and 2 chairs as part of the booth package. They are also allowed to bring in audio-visual equipment inside the hall, however, exhibitors who intend to rent additional furniture or audio visual equipment may do so. This is subject to availability of the requested item. The exhibitor must submit the request form on/before the stipulated deadline.

5. TELEPHONE

Telephone services are available at the business center. Exhibitors may also rent temporary telephone lines through the Event Organizer by filling out the enclosed **FORMS** (See Form 9). Full payment should be first settled before the telephone installation.

6. DAMAGES

Exhibitors are responsible for the cost of replacing or repairing any damages or dilapidation to the exhibition premises and booth specifications caused by themselves, their agents, their contractors or by any person/s employed or engaged on their behalf. The cost will be assessed by the official contractor and will be charged to the exhibitor. The Event Organizer, together with the Venue Management, will inspect the hall before and after the exhibition.

7. UNFORESEEN OCCURRENCES

In the event of any occurrence not foreseen in this Exhibit Guidelines, Rules and Regulations, the decision of the Event Organizer shall be final.

8. DISPUTE SETTLEMENT

In the event of a dispute, the Event Organizer shall exercise the right to handle matters in the interest of the exhibition concerned. The decision of the Event Organizer in any problem or dispute will be final.

9. IMPORTANT PRECAUTION

NOTICE: Even if the Event Organizer will maintain security surveillance at all times, exhibitors must be reminded that goods and personal belongings, such as cellphones, digital cameras, laptops and bags, may be at risk at any given time.

In line with this, CONEX Operations is reminding again our Exhibitors to be vigilant and careful with their exhibits and personal belongings within their respective booths. In recent years of UAP CONEX Exhibits, thefts of laptops and other valued electronic devices have been reported time and again.

THEREFORE, AGAIN, WE ARE ADVISING OUR EXHIBITORS AND GUESTS:

- a. If such devices are not particularly necessary part of your booth's operation, we discourage you and your company from bringing in such items.
- b. Do not leave your booth unattended, and beware of guests doubling as posers that will pretend to inquire about your products, distracting your exhibitor from other things while an accomplice prowls your booth. REMEMBER THAT CONEX IS OPEN TO THE GENERAL PUBLIC.
- c. Don't assume your belongings will be secure in your booth. Take anything valuable with you when you leave. If possible, avoid leaving the booth unattended while the public is present. We recommend it most ideal to assign at least 3 company personnel to man your booth.
- d. Lunch breaks and snack times are very vulnerable moments of the day as exhibitors will most likely leave the exhibit hall to eat. Exhibitors are advised to program their breaks accordingly. The organizers will also advise the SMX security to be more vigilant during these times of the day, particularly in the afternoon, where all reported thefts are occurred.

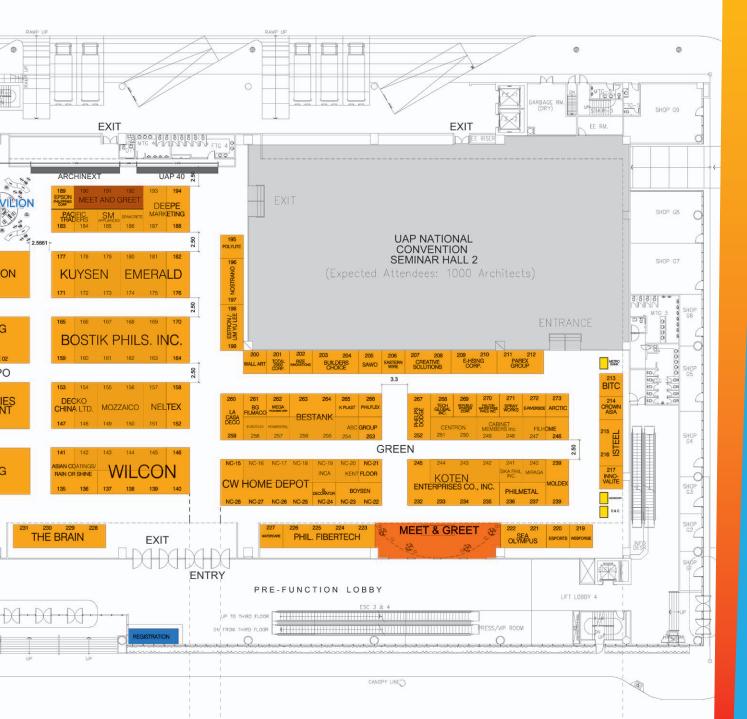

10. FORCE MAJURE

In the event that the exhibition is postponed, shortened or extended due to any cause beyond the control of the Event Organizer, the Event Organizer **shall not** be held responsible for any loss obtained by the exhibitor. Such causes may be directly or indirectly attributable to the elements of nature. Under such circumstances, the money paid by the exhibitors, or any part thereof, is refundable at the sole discretion of the Event Organizer.

System pro *E* comfort[®]. New MISTRAL65 series Unique design. Unlimited possibilities

Versatility and efficiency in a unique, elegant and unmistakable design MISTRAL65 is ABB's new and innovative series of IP65 rated consumer units. The range includes solutions with opaque door or else in the exclusive new transparent colour petrol blue, opening 180° and completely reversible. The ample internal space is easily accessible, and has been designed to reduce cabling times as well as allow total integration between modular DIN-rail MCBs, MCCBs and devices installed in the front of the panel. MISTRAL65 offers a wide range of sizes, from 4 to 72 modules, making this series suitable both for residential and industrial installations. www.abb.it/lowvoltage

Power and productivity for a better world™

THE SOLUTION TO THE PHILIPPINES HOUSING CRISIS

INTRODUCING

Compressed Agricultural Fiber (CAF) Panel & Building System

Using AGI Stramit Technology-Rice or Wheat Straw is heated and compressed underpressure forming thermo-set building panels which are all natural, safe, strong sustainable and can be constructed into low cost affordable housing in mass quantity. The CAF building components are non-toxic, mold & pest resistance, energy efficient, highly sound absorbent and nearly fireproof. The purchase and use of the agricultural by-product (straw waste) avoids an undesirable carbon event and creates a new, secondary cash crop for the local farmer. The embedded energy process actually (cradle-gate) has negative carbon footprint. There simply is no GREENER, more SUSTAINABLE building product in the world.

Philippine Exclusive Distributor

The Architectural Finishing Specialis

Established in 2002, CMI has emerged as one of the region's leading specialty distributors in the construction industry, offering an extensive inventory of quality building materials for commercial and residential use, meticulously sourced and selected for their durability, innovativeness and aesthetic appeal.

Its growing reputation for excellence, resourcefulness and responsiveness is no accident. it is a natural consequence of the values that have guided the company since its founding: an energetic enthusiasm, sensitivity to the needs of the clients and a craftsman like pride in knowing that the product it offers will last for generations.

Today, CMI takes pride in being the leading distributor of globally-recognized brands in building materials and continues to surge ahead as the architectural finishing specialist.

Creative Solutions & Innovation / (CSI) BIOWOOD Philippines was established in 2011 with the aim of providing innovative, industry changing, green building product that will help reshape the outlook of the Philippine construction Industry in building materials

CSI Biowood Phil. is the exclusive distributor of GRM Biowood brand composite wood products here in the Philippines.

The architectural composite wood products are designed by GRM (Green Resources Material) Australia and is manufactured in

Indonesia by P.T. Latrade GRM Indonesia.

GRM BIOWOOD composite building material is a sustainable, eco-friendly product that can be used to replace natural wood products. Its composition is made up of 77% wood fiber (Germany) & 23% uPVC (Mitsubishi, Japan). The colorants use (Clarion, Germany). The uPVC component is known to have stronger resistance against chemicals, sunlight & oxidation from water. It is non-toxic, asbestos free & has obtain an E1 rating for European formaldehyde emission standard. It has no vitalates (carcinogenic Agents).

We have over 400 profiles to choose from.

Decking & Flooring systems
Fencing System
Wall Panel (Indoor / Outdoor)
Ceiling Systems
Sunshade & screen system
Door Profile
Planter Box, Gazebos & Trellis

BioWood products are usually preferred over natural wood in many applications due to certain comparative advantages such as:

• FIRE RESISTANT• WATER RESISTANT• TERMITE RESISTANT• Does not suffer from undesirable cracking, splitting, swelling or rotting characteristics of timber• Vast choice of colours• Easy Installation• Fast Turnover• Environmentally friendly• Low maintenance• Sustainable alternative for TIMBER and ALUMINUM• Innovative concept fixing and fastening systems that save for installation costs• Paintable• Does not bleed. In addition, when subject to fire, Biowood Composite Wood, unlike timber and other composites, is NON-COMBUSTIBLE and SELF EXTINGUISHING

GRM BIOWOOD is a certified member of the different Green Building Councils in Southeast Asia like that of Singapore, Indonesia, Australia, Malaysia, Thailand, Vietnam and the Philippines.

BIOWOOD is a Green Certified Building Product from SGBC (Singapore Green Building Council)

ISO 9001:2008 CERTIFIED

 DSL LED BRAND, BULB: EPISTAR, CREE, **COB & BRIDGELUX**

From 2003 up to Present, the company expand into LED light (Light emitting diodes) that plays a big part in today's modern design and technology for decorative/Conventional lighting which enables individual design, for decorating buildings, homes and business establishment to help enhance and be recognize thru its unique features.

The inherit features of LED decide it to be the best alternative to conventional light sources; LED consumes 50% less energy than other lighting and does not emit heat, low voltage, low maintenance and has a lifetime of up to 50,000 hours.

DSL has developed and is currently focusing on a new series of LED Application, as the products are more likely to gain greater popularity. DSL main product segments are broken down into Decorative Lighting, LED Application, Commercial Lighting, Architectural lighting and Entertainment lighting. Our company seen by our customers as a "one-stop shop" product.

Our expertise and completed projects has been well proven in much significant development in the Philippines. Involving the complete design, information, installation and after sales service required by its countless discriminating clientele.

For more than 30th years of service, the company has expanded its product to the Filipino people. Continuous innovation of product quality and trustworthy business relationship with our customers, are the foundations of DSL GAM Enterprise. We are taking a great step forward into the new era with vision and confidence.

SANIFLO is a macerator pump that offers you to install toilets anywhere in your house even in your basement or attic without relocating your septic tank. It grinds the waste and pumps 5 meters high or 100 meters across using a 1 1/2 " pipe. All you need to do is to tap it into your existing sanitary pipe.

Install a bathroom where you need it

Install a bathroom closer.

Transform your storage into a bathroom.

Install additional bathrooms for more comfort

ASK ABOUT OUR CREDIT CARD PURCHASE OPTION

At the heart of every home is a dream of permanence.

"Like every homeowner, we wanted things that were more than beautiful," said the Antonio Robles, long-time Kenneth & Mock user. "We wanted to ensure that things lasted and aged as gracefully as we hope to."

And so it was that seventeen years ago, they found Kenneth & Mock.

With its German technology PVC-U profiles by Kömmerling, state-of-the-art hardware from Roto Frank of Germany, exclusive screen systems by Genius of Italy, and many other unique features combined with and by world-class craftsmanship, Kenneth & Mock has established itself as the best and most premium window and door solution in the country.

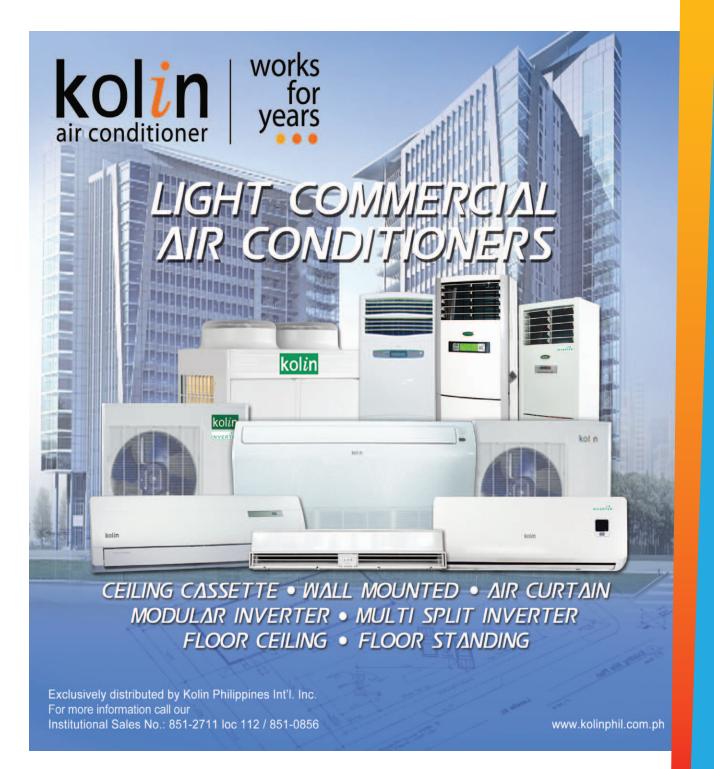

And seventeen years hence, our concerned homeowners have found that the windows and doors by Kenneth & Mock have not only retained much of their original appearance, but swing and slide as smoothly and as precisely as they had since they were first installed. Sublimely beautiful and functionally elegant, Kenneth & Mock aims to repeatedly find itself the proud testament to its own promise of standing the test of time. And ultimately, for a name like theirs, it is never merely about fulfilling needs and addressing concerns. It's about always exceeding expectations.

Closets and Cabinets

Aluminum and glass are the materials that brings in <u>luxurious looks in your kitchen</u> have been always a choice of most interior designers and architects. Our aluminum profile are designed to maximize the space of our modern living with a wide range selection of decorative glass provide simple but elegant designs.

TRANSLUCIDO GLASS

Its translucent effect allows transmission/diffusion of light and it offers some degree of privacy as objects are not seen clearly as thru transparent glass. It is best used as dividers, partitions, wall or ceiling accent and doors where lighting plays an important role.

Stick on it. Write on it.

"The latest trend in Office and Home Design"

The Magnetic Glass writing board can be used in a variety of applications like in meeting rooms, training rooms and memo board replacing traditional blackboards or whiteboards.

SUPERIOR TECHNOLOGY FOR GREEN BUILDING

Stronger. Faster. Economical

SRC Panel System is a pioneer manufacturer of wall panels used for interior and exterior in buildings and homes; with several advantages in construction, such as heat and noise insulation, and built to stand super typhoons or earthquakes.

Steel Reinforced Concrete Panels are made of polystyrene with wire mesh sandwiched in between cement. This innovative product is rapidly becoming popular among architects and contractors. SRC Panel System is a member of the Philippine Green Building Council.
